made to create **BERNINA**

# REFERENCE MANUAL

**BERNINA CrossStitch**

**NOTE**

The screen illustrations in this publication are intended to be representations, not exact duplicates of the screen layouts generated by the software.

**LIMITED WARRANTY**

BERNINA International AG warrants for a period of 90 days, commencing from the date of delivery of the software to you, that the products are free from defects in materials and workmanship. Your exclusive remedy for breach of warranty is to return the products together with proof of purchase to BERNINA or its authorized dealers within the warranty period, and they will be replaced free of charge. You are responsible for the cost of shipping and insurance, and bear the risk of loss, damage and misplacement of 'the products'.

The purchaser relies on their own skill and judgment in selecting the software for their own use and assumes the entire risk as to the results and performance of the software. Subject to warranties and conditions imposed by law, BERNINA International AG expressly disclaims all other warranties and conditions, whether express or implied, including without limitation, warranties and conditions of merchantability, fitness for a particular purpose, title and non infringement. BERNINA International AG specifically does not warrant that the software will meet the purchaser's requirements or run without interruption or error, or appear precisely as described in the accompanying documentation.

**LIMITATIONS OF LIABILITY**

To the maximum extent permitted by applicable law, in no event will BERNINA International AG or its developers, officers, employees or affiliates be liable to you for any consequential, incidental, or indirect damages (including damages for loss of business profits, business interruption, loss of business information and the like), whether foreseeable, or unforeseeable, arising out of the use of or inability to use the software or accompanying components, and accompanying documentation, regardless of the basis of the claim and even if BERNINA or an authorized BERNINA representative has been advised of the possibility of such damages.

Some states or jurisdictions do not allow the exclusion of incidental, consequential or special damages, so the above limitation or exclusion may not apply to you.

**COMMERCIAL USE OF EMBROIDERY DESIGNS**

With the purchase of BERNINA® Embroidery Software, BERNINA International AG grants the user the commercial use of all included embroidery designs (i.e. for sales, advertising, etc.), provided that the embroidery design is embroidered on a fabric (or similar). This includes all integrated embroidery fonts, but excludes all TrueType fonts and trademarks in general, in particular those of BERNINA International AG.

The commercial use of embroidery designs from BERNINA® Embroidery Software as files in digital form (i.e. individual sale of included embroidery designs) is not permitted unless the design file as such has been significantly modified. Significant means an obvious modification compared to the original embroidery design. For users using CorelDRAW®, also refer to the End User License agreement found under 'About CorelDRAW SE'.

**TERMINATION**

Your License to use the BERNINA® Embroidery Software is effective as long as you comply with the terms and conditions of the License Agreement. This License will terminate automatically without notice from BERNINA International AG if you fail to comply with any of the terms of the License Agreement. You may terminate this License at any time by returning the BERNINA® Embroidery Software, all copies thereof as well as all accompanying documentation and components to BERNINA International AG. You will not be entitled to a refund of any kind.

**CONTACT**

If you have any questions, please contact your BERNINA distributor, or

# CHAPTER 1

# INTRODUCTION TO BERNINA CROSS STITCH

Cross stitching is a popular technique for filling large areas with low stitch counts. It can also be used for outlines and borders. It is suitable for homeware, tablecloths, children's clothes and folk designs. Cross stitch is sometimes combined with appliqué.

Unlike machine embroidery where designs are enhanced with different stitch types, angles, and effects, in cross stitch you can only add dimension to the design with shades of colors. For this reason, most cross stitch designs use many more colors than machine embroidery.

This section provides an overview of the various cross stitch types.

## Types of cross stitch

Cross stitches are created on a matrix of squares or 'pixels'. Any part of the square can be stitched, from the edges to the diagonals. The full range of cross stitches is listed below.

	Full cross		Upright cross		Three-quarter cross
	Double cross		Half cross		Elongated vertical cross

	Quarter cross		Elongated horizontal cross		Mini cross
	Single line		French knot		

## Cross stitch fills

When using cross stitch as a fill you can select from any of the cross stitch fill types.

### Full cross stitch

Full cross stitches are made up of two equal-length stitches that cross at the center to form an X. The overall effect of the fill depends on which stitch in the X lies underneath or on top. You can also mix and match for special effects.

### Three-quarter cross stitch

A three-quarter stitch is most often created by stitching a quarter stitch followed by a half stitch. A different effect is achieved by stitching the half stitch first and anchoring it with the quarter stitch.

**Note** The long arm of the three-quarter stitch can go either / or \ directions.

Frequently a quarter stitch and a three-quarter stitch of different colors share a single square. Mix and match their positions to give different effects.

Mixtures of quarter and a three-quarter stitches

### Half cross stitch

A half stitch is simply a diagonal stitch that looks like / or like \. Half stitches are usually used for shadows and background shading. The stitch can start from any corner. Sometimes two half stitches of different colors are used to make one full cross stitch.

Half stitches can go in either direction depending on the effect you want to achieve. For example, half cross used to represent feathers would slant in the direction of the feathers themselves.

### Quarter cross stitch

Quarter stitches are used to stitch more intricate patterns.

### Mini cross stitch

Mini cross stitches are two equal-length stitches that cross at the center to form an X but they only fill quarter of the square. Use mini cross stitch for details such as eyes or for a denser look in parts of your design.

### Upright cross stitch

Upright cross stitches are comprised of a vertical and horizontal stitch.

The stitches can be worked diagonally across the canvas, or in a horizontal or vertical line.

## Double cross stitch

Double cross stitch is comprised of two full cross stitches stitched at 90° on top of each other. A double cross stitch resembles a star. It is generally used in a scattered fashion or worked into a row to form a decorative border.

Typically the top thread of the bottom cross is the stitch which lies at 135° to the horizontal. The top thread of the overlapping cross is the horizontal stitch.

## Elongated cross stitch

Elongated cross stitch consists of two equal-length stitches that cross to form an X. There are two types:

- ▶ elongated horizontal cross stitch
- ▶ elongated vertical cross stitch.

Elongated horizontal cross stitches are only half the height of normal cross stitch and elongated vertical cross stitches are only half the width of normal cross stitch.

## French knots

French knots were originally a hand-stitch used to create a raised look for embellishment. They were traditionally used in 'whitework' with very fine cotton and silk threads.

French knots can be used in combination with other cross-stitch types. Use them for eyes, door knobs, or dots for flower pistils. Or use them in place of the beads used in hand-work designs – e.g. ornaments on a Christmas tree or to dot the letter 'i'. Try them with colorful metallic or variegated threads. Use them as an outline border. Try them with colorful metallic or variegated threads. French knots are better sewn in larger grids.

## Cross stitch borders

Cross stitch can be used as an embroidery outline or border. You can also combine cross stitching with other stitch types to achieve special effects.

You can make outlines with **Single Line** or **Full Cross** stitches or a combination of both for a denser border. A **Single Line** outline is treated by the software as a border while a **Full Cross** outline is treated as a fill. This is important if you need to delete a border because a single line can be deleted as a single object while a full cross stitch border cannot.

### Single line border

Single line stitches are only used to create borders or add details. The single line can be placed on any side of the square. Click on the side you want to place the line. You can place a single line border on one side or all

four sides of the square. The single line border can be placed in a square which already has a cross stitch in it.

### Full cross border

Full crosses can also be used as a decorative outline stitch. If you use full cross as a border it will be the same cross stitch type as selected in the fill stitch type list. You can change this by changing the fill stitch type.

## Cross stitch variations

---

The orientation of fractional cross stitches can be varied to create different patterning effects. You do this directly pixel-by-pixel, or by setting a fill stitch orientation. You can also combine fractional cross stitches in a variety of ways. See also [Types of cross stitch](#).

### Three-quarter cross stitches

Quarter and three-quarter cross stitches can be used to create rounded edges. See also [Cross stitch fills](#).

## Half cross stitches

Half cross stitches can be used to give objects an 'airy' look. You can also use half cross stitches to make a full cross stitch with two colors. See also [Combination stitches](#).

## Quarter cross stitches

Quarter and three-quarter cross stitch can be used to smooth rounded edges. You can also use quarter cross stitch to make a full cross stitch with up to four colors. See also [Combination stitches](#).

## Mini cross stitches

Use mini cross stitch for details such as eyes or for a denser look in parts of your design.

### Elongated cross stitches

Vertical and horizontal elongated cross stitches are made up of two equal-length stitches that cross to form an X. They fill either the left, right, top or bottom of the square.

### Combination stitches

Quarter, half and three-quarter cross stitches can be combined to make crosses comprised of multiple colors. You can also combine mini crosses, elongated vertical or horizontal crosses and outline stitches.

# CHAPTER 2

## CROSS STITCH ESSENTIALS

---

Cross stitch design involves a different digitizing technique to normal embroidery design. For this reason, BERNINA Cross Stitch is a separate application to the main BERNINA Embroidery Software application. It also has a different work environment with different settings for design size and density. Like the main application you will do most of your work with digitizing backdrops. Design viewing is also different to BERNINA Embroidery Software.

This section describes the use of the BERNINA Cross Stitch design window, as well as techniques for setting up your work environment and design size and density. It also covers working with backdrops and viewing cross stitch designs. It also discusses handling of cross stitch design files.

### Launching BERNINA Cross Stitch

---

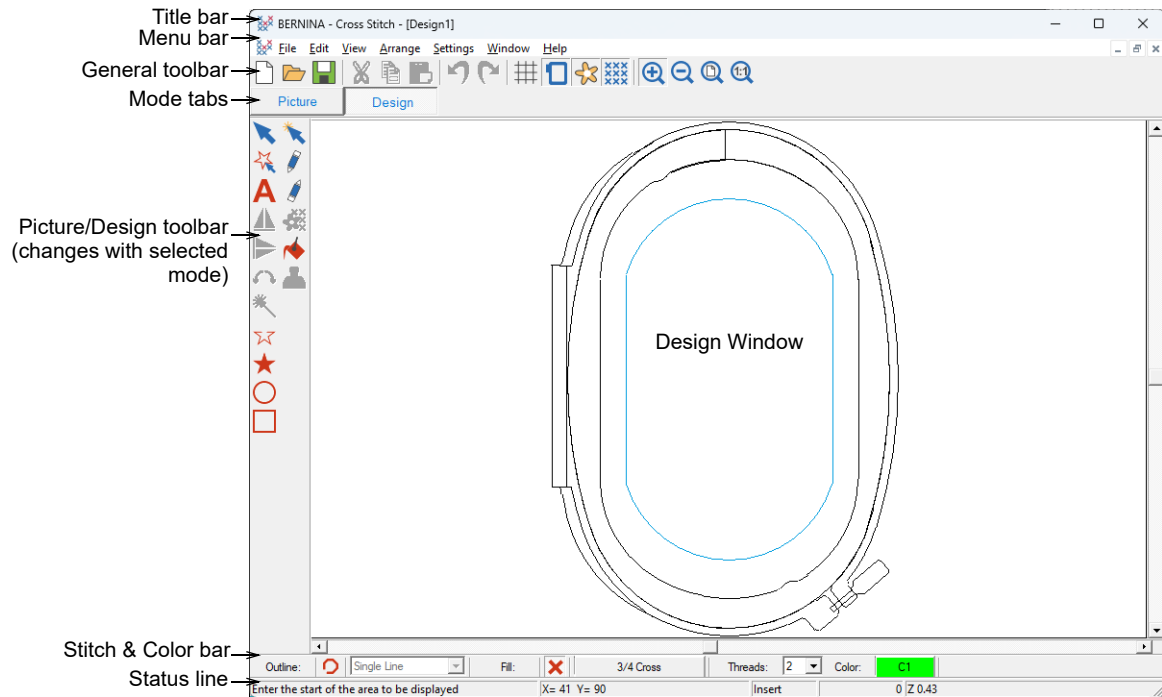

Cross stitch design involves a different digitizing technique to normal embroidery design. For this reason, BERNINA Cross Stitch has its own design window which you open from within BERNINA Embroidery Software.

## To launch BERNINA Cross Stitch...

- ▶ Run BERNINA Embroidery Software.
- ▶ Go to the **Applications** toolbox and select **Cross Stitch**.

BERNINA Cross Stitch opens in its own design window.

## Setting design size & density

---

In BERNINA Cross Stitch, design size is determined by 'fabric count'. The more stitches per inch, for example, the smaller and more compact the design. In addition, you need to set up your design grid for easy visualization and cross stitch placement. You can also visualize your design within a target hoop. Similarly, you can select a background color or fabric for more realistic previews and presentations.

### Set design size

You set cross stitch design size by adjusting the 'fabric count', generally defined as 'holes per inch'. This actually changes the scale of your finished design. The more stitches per inch, the smaller and more compact the resulting design.

Cross stitch fabric used in handcraft is woven with the same number of threads in each direction to create evenly-sized squares. There are two

main types – aida and linen. Aida is the most popular. It is made from 100% cotton and comes in various fabric counts.

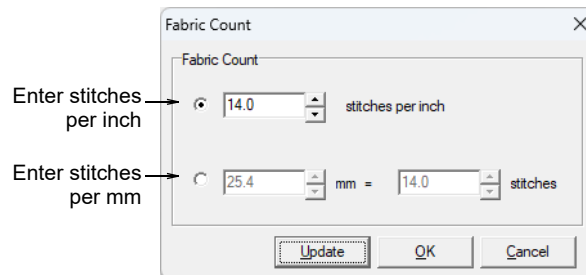

Different cross stitch fabrics with varying fabric counts

Known commercially as 'evenweave', these fabrics are suited to traditional cross stitch because they produce evenly-sized thread blocks in both directions. Stitches appear as squares or parts of squares. The higher the fabric count, the tighter the weave, and therefore the smaller the cross stitches produced. Fabric count in machine embroidery still determines design size – the more stitches per inch, the smaller and more compact the design. However, fabric count in the software does not necessarily correspond to fabric warp and weft when stitched on the machine.

### To set the design size...

1 Select **Settings > Fabric Count**. The **Fabric Count** dialog opens.

- 2 Select a fabric count option, inches or millimeters:

Option	Purpose
Stitches per inch	The fewer stitches per inch, the bigger the resulting design.
Stitches per mm	Because a cross stitch is bigger than a millimeter, you can adjust the mm and stitch settings in relation to each other. The higher the mm value, or smaller the stitch value, the bigger the design.

**Tip** By clicking **Update**, you get an immediate conversion of any values you have entered. For example, change the **stitches per inch** value, click **Update**, and the corresponding **stitches per mm** value will be updated.

- 3 Click **OK**.

15 stitches per inch

15 stitches per 25.4 mm

10 stitches per inch

10 stitches per 25.4 mm

## Set stitch density

Threads: 2

Use Threads list (Stitch and Color bar) to set the stitch density.

A common problem with cross stitch designs is that they 'pull', especially with smaller, closely packed stitches. Cross stitch designs tend to pull in a uniform way with gaps usually forming in straight lines. Sometimes holes appear giving the impression of missing stitches. To mitigate these problems, you can adjust cross stitch density by stitching once, twice or

three times. The number of 'crossovers' correspond to the values **2**, **4** and **6** in the **Threads** list. You can change these values at any time.

**Tip** If you create a design where every square has a stitch, remember to baste and stabilize the fabric.

---

### To set the stitch density...

- ▶ Select a value from the **Threads** list.

The value **2** corresponds to a single stitch, **4** is double, while **6** is triple. This is represented on screen by line thickness.

**Tip** When you move your mouse over the stitch, a tool tip will tell you the type and color of stitch used.

## Setting up work environment

---

For cross stitch work, you need to set up your design grid for easy visualization and cross stitch placement. You can also visualize your design

within a target hoop. Similarly, you can select a background color or fabric for more realistic previews and presentations.

## Picture & Design modes

Picture

Click the Picture tab to load a picture to be used as a template.

Design

Click the Design tab to edit and add stitches.

BERNINA Cross Stitch uses two window modes, **Picture** mode and **Design** mode. Use **Picture** mode to open or scan a picture to use as a template for stitching. Edit your picture in **Picture** mode, then select **Design** mode to edit your stitches or go directly to **Design** mode to add stitches without using a template. To see your design in **Artistic** mode, open it in BERNINA Embroidery Software.

## Related topics

- ▶ [Use cross stitch files with BERNINA Embroidery Software](#)

## Change grid settings

Click General > Grid to show or hide the grid. Right-click to open the Grid dialog.

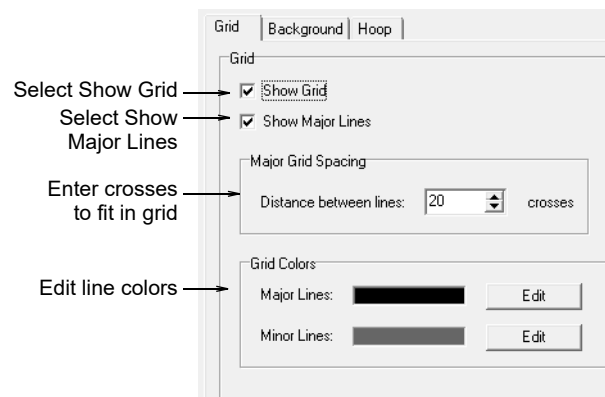

Use the **Options > Grid** dialog to change grid settings:

- ▶ Show or hide the grid
- ▶ Show major lines (when grid is on)
- ▶ Set the grid spacing
- ▶ Change the color of major and minor lines.

---

### To change grid settings...

1 Right-click the **Grid** icon. The **Options > Grid** tab opens.

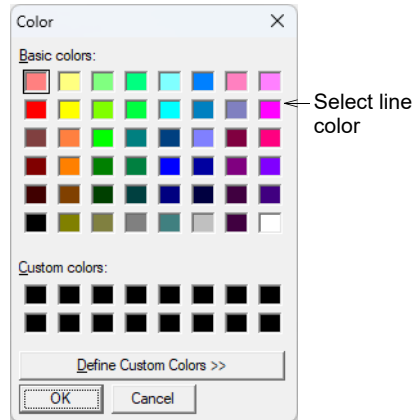

2 Select the **Show Grid** checkbox to show grid lines.

3 Select **Show Major Lines** to show major grid lines.

4 Enter the number of crosses to fit between the major grid lines.

- 5 Click **Edit** to change the color of the major and minor lines.

- 6 Select from the available colors or define your own. Click **Define Custom Colors** to mix your own colors from the color wheel.
- 7 Click **OK**.

## Change hoop settings

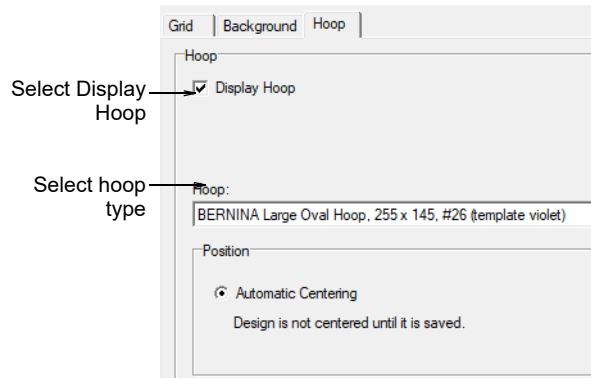

Click **General > Hoop** to show or hide the hoop. Right-click to open the Hoop dialog.

You can show or hide the hoop, change the hoop size and center the design in the hoop.

---

## To change hoop settings...

- 1 Right-click the **Hoop** icon. The **Options > Hoop** tab opens.

- 2 Select the **Display Hoop** checkbox.
- 3 Select a hoop type from the list.

**Note Automatic Centering** is always on. To make a group of stitches sit on one side of the design, digitize some temporary stitches on the other side.

- 4 Click **OK**.

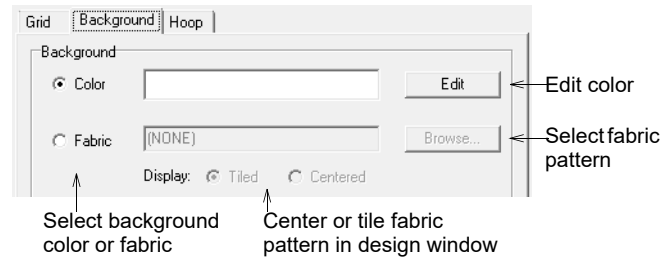

**Tip** If you resize a design to fit inside the hoop, stitches may be stacked on top of each other and pull the fabric. You can avoid this problem by reducing the number of crossovers to single (2 threads) for both fills and outlines. You can also use a thinner weight thread. See also [Set stitch density](#).

## Change background colors & fabrics

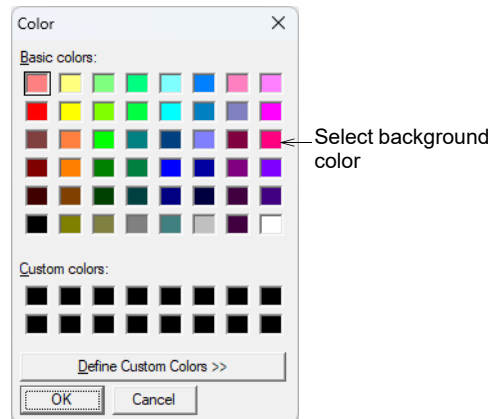

In BERNINA Cross Stitch you can change the background color of the design window to match the color of your fabric. Or you can select a background fabric for more realistic previews and presentations.

To change the background color or fabric...

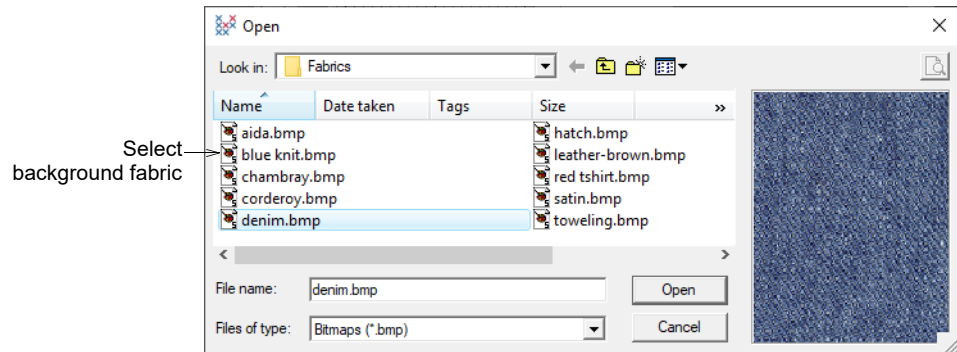

- 1 Select **Settings > Options**.
- 2 Select the **Background** tab.

- 3 Select the design window background type.
  - ▶ **Color**: uses the selected color.
  - ▶ **Fabric**: uses an image of a fabric.
- 4 Select a color or fabric to use.
  - ▶ To select a background color, click **Edit**. Select a color from the **Color** dialog and click **OK**.

- ▶ To select a fabric, click **Browse**. Select a fabric type from the **Open** dialog and click **OK**.

You can center or tile the fabric bitmap in the design window. If the bitmap is large enough to fill the entire window, select **Center**. Otherwise, select **Tile**.

- 5 Click **OK**.

## Working with backdrops

---

Bitmap images can be inserted or scanned into BERNINA Cross Stitch for use as digitizing backdrops. You can digitize backdrop images automatically using **Auto Stitch**. Use solid color bitmaps to make suitable color blocks for cross stitches.

**Tip** If an image needs to be resized or rotated, it is best to do so during scanning. Scaling afterwards may distort the image.

## Insert bitmap images

Use Picture > Load Picture to open a picture.

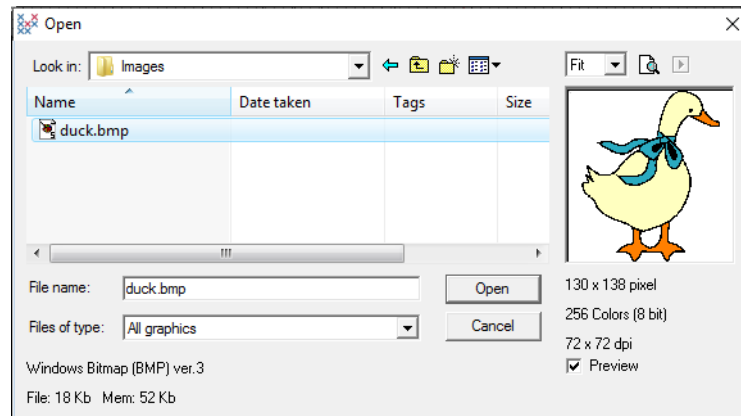

Use Picture > Scan Picture to scan your artwork.

You can insert bitmap images of various formats for use as digitizing backdrops.

### To insert a bitmap image...

- 1 Click the **New** icon. A new file opens.
- 2 Click **Picture** mode to open a picture.
- 3 Click **Load Picture**. The **Open** dialog opens.

- 4 Select a folder from the **Look In** list.
- 5 Select a file type from the **Files of Type** list (e.g. BMP).
- 6 Select the file you want to insert.

**Tip** Select the **Preview** checkbox to preview the selected file.

7 Click **Open**.

8 Move the picture so it fits inside the hoop or change the hoop size.

**Note** Areas outside the hoop will not be stitched.

---

### Related topics

- ▶ [Change hoop settings](#)

## View & hide bitmap images

Click **General** > **Picture** to show or hide the picture.

You can show or hide a bitmap backdrop temporarily while you digitize in **Design** mode.

---

### To view or hide a bitmap image...

- ▶ Click the **Picture** icon to show the image.
- ▶ Click it again to hide the image.

Show picture

Hide picture

## Scale & transform bitmap images

You can scale and reshape images once they are loaded into BERNINA Cross Stitch. However, if an image needs to be resized or rotated, it is best to do so during scanning. Scaling afterwards may distort the image.

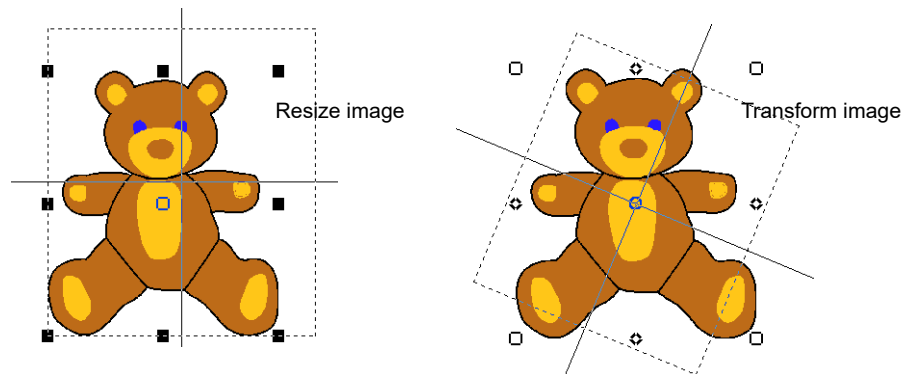

### To scale or transform a bitmap image...

- 1 Insert the image.
- 2 Click the **Select** icon.
- 3 Click the image.

Eight resize selection handles appear around the image. Click and drag these to scale the image as you would any other object.

- 4 Click the image again. Eight transform selection handles appear around the image. Click and drag these to rotate or skew the image as you would any other object.

---

## Related topics

- ▶ [Insert bitmap images](#)

---

## Viewing cross stitch designs

---

While you are working in BERNINA Cross Stitch, you will toggle between different viewing modes to better visualize and understand your design. You will also routinely consult the **Status Bar** for important information about the design.

### View crosses & colors

Click General > Crosses to show stitches as colored tiles or cross stitches.

There are two display modes for BERNINA Cross Stitch – crosses or colored tiles. When you change to tile mode, you see the same result as when you import a bitmap into the design window.

---

### To view a design as crosses or tiles...

- 1 Select **Design** mode.

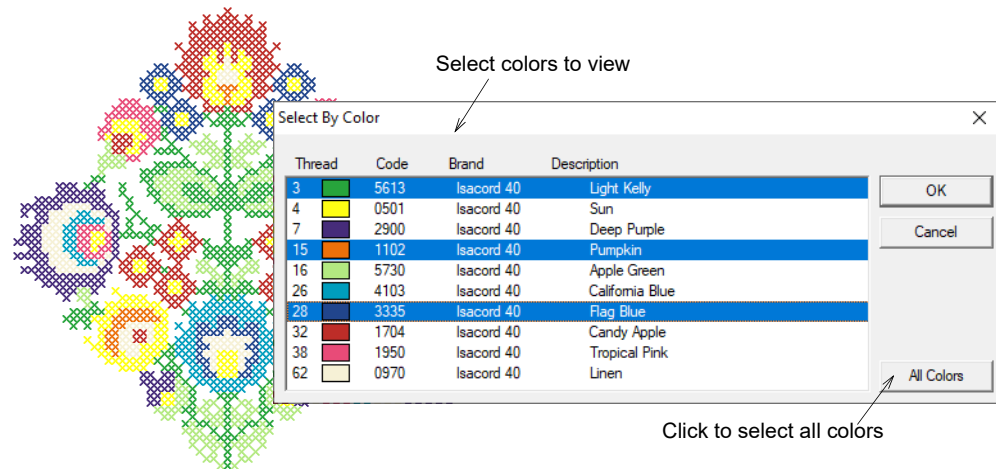

- 2 Click the **Crosses** icon. Any digitized areas are shown as crosses (or lines for line borders).
- 3 Click again to show stitches as colored squares.

### To view a design by color...

#### 1 Select **View > View by Color**:

- ▶ To select a range of colors, hold down **Shift** then select first and last.
- ▶ To select multiple colors, hold down **Ctrl** and click.

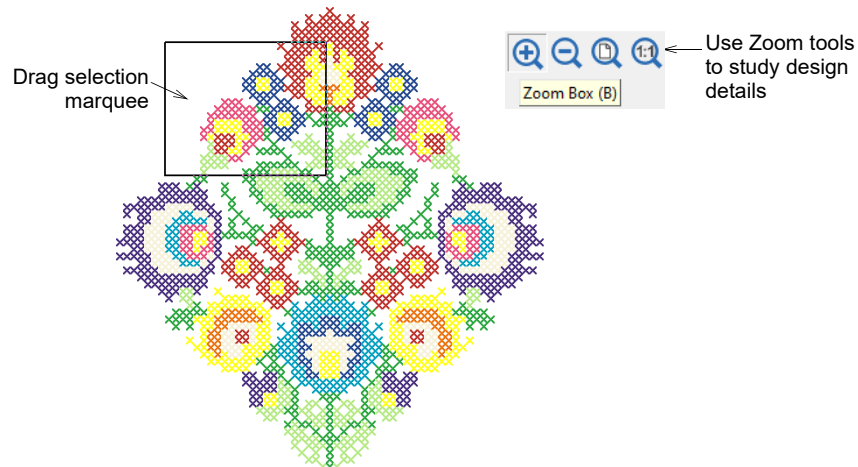

- 2 Click **OK** to view. To view all colors again, click the **All Colors** button in the dialog.

- 3 To view all colors again, click the **All Colors** button in the dialog.

## Zoom tools

**Zoom** tools allow you to magnify your view of the design by zooming in on individual stitches or details. Zoom tools are available from the **View** menu and **General** toolbar. Experiment with the available options.

For instance, to zoom in on a section of design, select **Zoom Box** or press **B**, and drag a marquee around the zoom area. To display the whole design, select **Show 1:1** or press **1**.

## View design information

The **Status Bar** provides design information such as individual stitch information, approximate stitch count and thread usage as well as the zoom factor of the design.

## Handling cross stitch design files

Cross stitch designs have their own ARX file format. This can be read by BERNINA® Embroidery Software. You can also combine ARX with designs in other formats.

## Save cross stitch designs

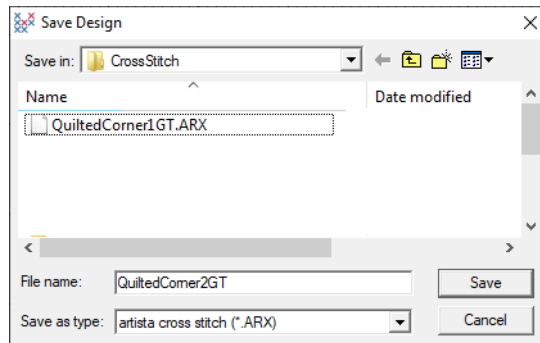

Use General > Save to save cross stitch files.

Save your design early and often. Use the ARX extension for saving cross stitch files.

---

### To save a cross stitch design...

- 1 Select **File > Save**. If this is the first time you have saved the design, the **Save As** dialog opens.
- 2 Select the cross stitch file type from the **Files of Types** list. You can only save in ARX format.

- 3 Type a new name for the design and click **Save**.

## Use cross stitch files with BERNINA Embroidery Software

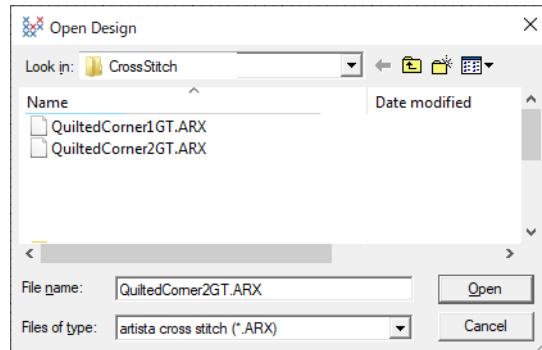

Cross stitch designs are saved as ARX files. These can be opened directly into BERNINA Embroidery Software and combined with other embroidery.

---

### To use a cross stitch file with BERNINA Embroidery Software...

- 1 Start BERNINA® Embroidery Software.

- 2 Select **File > Open**. The **Open Design** dialog opens.

- 3 Select ARX files from the **Files of Type** list.
- 4 Select your file.
- 5 Click **Open**. The cross stitches display as they will be stitched.

# CHAPTER 3

## CROSS STITCH DIGITIZING

---

In BERNINA Cross Stitch you can add cross stitches either to an entire design or selected areas. Or you can place them individually. There are two stitch types, **outline** and **fill**. An outline stitch can be a single run, or a line of cross stitches. A fill can be any of the cross stitch types. You can preset stitch type, length and the number of times each stitch is sewn.

This section describes techniques for manual cross stitch digitizing. It also covers automatic techniques and cross stitch lettering.

### Cross stitch colors & types

---

BERNINA Cross Stitch provides the full range of cross stitch types which you can use to create outlines and fills of any color. You can also control the orientation of fractional cross stitches to create different patterning effects.

## Select stitch colors

Color: C1 Use Stitch and Color > Color Palette to select a stitch color.

You can select stitch colors from the **Color Palette** before digitizing, or apply a new color to selected areas.

### To select a stitch color...

- 1 Click or right-click the color palette to open it.

**Tip** If you want the **Select Thread** dialog to remain open, right-click the color palette.

- 2 Select a color.

- ▶ Select a color from the color palette to apply to newly digitized areas.
- ▶ Select a stitch block, then select a color to change its color.

Stitches will be digitized in the selected color.

**Tip** You can drag the **Select Thread** dialog and place it anywhere in the design window. Click and drag the edges to reconfigure as preferred or to display hidden colors.

## Select outline stitches

Outline: Use Stitch and Color > Outline for outline stitches.

Single Line ▼ Select an outline stitch from the Outline Stitch list.

There are two types of outline stitch, **Single Line** and **Current Cross Stitch**. Select a cross stitch type before selecting **Current Cross Stitch**.

### To select an outline stitch...

- 1 Click the **Outline** icon.
- 2 Select a stitch type from the **Outline Stitch** list.

New stitches will be digitized as single lines or crosses. If you are using **Current Cross Stitch**, the currently selected cross stitch type applies.

**Note** Depending on the stitch type you select, you can set the direction of the stitch.

### Related topics

- ▶ [Set cross stitch orientation](#)

## Select fill stitches

Fill stitches are all cross stitches. Choose from amongst the following: full cross, three-quarter cross, half cross, quarter cross, mini cross, upright cross, double cross, elongated vertical cross, and elongated horizontal cross.

### To select a fill stitch...

- 1 Click the **Fill** icon.
- 2 Click or right-click the **Fill Stitch** button.

**Tip** If you want the **Select Stitch** dialog to remain open, right-click **Fill Stitch** button.

Fill Stitch button

The **Select Stitch** dialog opens.

Select a stitch type

- 3 Choose a stitch type. Stitches will be digitized in that stitch type. The **Select Stitch** dialog closes.

Variety of cross stitch

**Tip** Depending on the stitch type, you can set stitch direction or orientation.

---

### Related topics

- ▶ [Cross stitch fills](#)
- ▶ [Set cross stitch orientation](#)

## Set cross stitch orientation

You can control the orientation of fractional cross stitches to create different patterning effects. When digitizing individual stitches, you do this directly pixel by pixel. When digitizing a fill, you do so via the **Select Fill Style** dialog. The method is the same.

Click in the quadrant to be filled

### To set cross stitch orientation...

- ▶ To create three-quarter cross stitches, click the corner where you want the quarter stitch to be.

- ▶ To create half cross stitches, click the corner where you want your stitch to start.

- ▶ To create quarter cross stitches, click the corner where you want your stitch to start.

- ▶ To create mini cross stitches, click the corner where you want your stitch to start.

- ▶ To create elongated cross stitches, click the corner where you want your stitch to start.

### Related topics

- ▶ [Types of cross stitch](#)

## Digitizing with cross stitches

BERNINA Cross Stitch provides techniques for digitizing single stitches or lines of stitches, filled and unfilled rectangles or circles, or filled and unfilled 'closed' free-form shapes. You can also create free-form outlines or

borders. The **Area Fill** feature lets you fill closed shapes or 'color blocks' with stitches.

## Digitize single stitches or lines

Use Design > Pencil to draw a single stitch or line of stitches.

You can digitize a single stitch or line of stitches. Depending on the stitch type you select, you must also set the stitch direction.

### To digitize a single stitch or line...

- 1 Click **Outline** and select an **Outline** stitch type. If you are using **Full Cross**, the currently selected cross stitch type applies.
- 2 Select a color from the color palette.
- 3 Click the **Pencil** icon.
- 4 Click a square to make a single stitch, or click and drag the pencil to make a line.

**Note** Press **Ctrl** and drag to draw straight vertical lines.

Single stitches  
and lines

**Tip** You can also use the **Pencil** tool to create combinations of partial crosses comprised of multiple colors.

---

- ▶ [Create combination stitches](#)

## Digitize circles

Use **Design > Circle/Oval** to draw and digitize ovals or circles.

The **Circle** tool provides a quick way to digitize filled or unfilled circles.

---

### To digitize a circle...

- 1 Click the **Circle** icon.
- 2 Select a color from the **Color** palette.
- 3 Select an **Outline** or **Fill** stitch type.
- 4 Mark the center point then mark a point on the circumference.
  - ▶ If you want a perfect circle, press **Enter**.
  - ▶ If you want an ellipse, mark a third reference point and press **Enter**.

The circle or oval is filled or outlined depending on the stitch type selected.

Full cross border

Full cross fill

Three-quarter cross fill

Half cross fill

## Digitize rectangles

Use Design > Rectangle to draw and digitize rectangles or squares.

The **Rectangle** tool provides a quick way to digitize filled or unfilled rectangles or squares.

### To digitize a rectangle...

- 1 Click the **Rectangle** icon.
- 2 Select a color from the **Color** palette.
- 3 Select an **Outline** or **Fill** stitch type.
- 4 Mark rectangle origin, then rectangle corner.

Press **Ctrl** and mark corners to digitize a square. The square or rectangle is filled or outlined depending on the stitch type selected.

**Note** Depending on the stitch type you select, you can set the direction of the stitch.

## Digitize open & closed shapes

Use Design > Closed Curve to draw and digitize closed shapes.

Use Design > Open Curve to draw and digitize open shapes.

You can create freeform outlines or borders using the **Open Curve** icon. You can create freeform filled shapes using the **Closed Curve** icon. Select an outline stitch for unfilled shapes and a fill stitch for filled shapes.

---

### To digitize an open or closed shape...

- 1 Click **Open Curve** or **Closed Curve**.
- 2 Select a color from the **Color** palette.
- 3 Select an **Outline** or **Fill** stitch type.
- 4 Mark reference points on your design. Left-click for sharp corners and right-click for round corners.

- 5 Press **Enter**. The shape is filled or outlined depending on the stitch type selected.

### Related topics

- ▶ [Select stitch colors](#)
- ▶ [Cross stitch colors & types](#)

## Digitizing images automatically

Using **Flood Fill**, you can create cross stitch fills from image color blocks. Alternatively, using **Magic Wand**, you can create cross stitch fills from colored sections of a picture. Alternatively, digitize the entire backdrop image automatically using **Auto Stitch**.

## Area-fill color blocks

Use Design > Area Fill to fill a closed shape or color block with stitches.

Fill closed areas with stitches using **Area Fill**. You can also use the tool to change the color and stitch type of **Full Cross** outlines.

**Note** The **Area Fill** tool only works on the cross stitch layer. It will not work with bitmap images used as backdrops.

---

### To area-fill a color block...

- 1 Select a color from the **Color** palette.
- 2 Select a **Fill** stitch type.
- 3 Click the **Area Fill** icon.
- 4 Click within a closed area. The shape is filled in the selected stitch type and color.

Digitized using  
Auto Digitizer

Colors changed  
using Area Fill

**Caution** **Area Fill** will not work within single outline shapes and some shapes with angled sides may not fill correctly. Try creating two rows of cross stitches around the outline.

---

### Related topics

- ▶ [Select stitch colors](#)

## Digitize with Magic Wand

Use Design > Magic Wand to create cross stitches from a colored area of a picture.

Using **Magic Wand**, you can create cross stitch fills from colored sections of a picture. **Magic Wand** works with both fill stitches and outlines.

---

### To digitize with Magic Wand...

- 1 Prepare your image as necessary. Use a third party paint program to clean up the image.
- 2 In **Picture** mode, load a picture.

- 3 In **Design** mode, click **Magic Wand**.
- 4 Select a cross stitch type.
- 5 Select a color from the palette.

- 6 Click a colored block in your picture. All areas of that color are digitized in the selected color.

**Note** The **Magic Wand** selects and digitizes all blocks of that color from your picture. You can change the stitch type and color later if you want.

---

## Digitize with Auto Stitch

Use Design > Auto Stitch to automatically create cross stitch designs from pictures.

Digitize the entire backdrop image automatically using **Auto Stitch**. You can change the stitch type manually later as required.

---

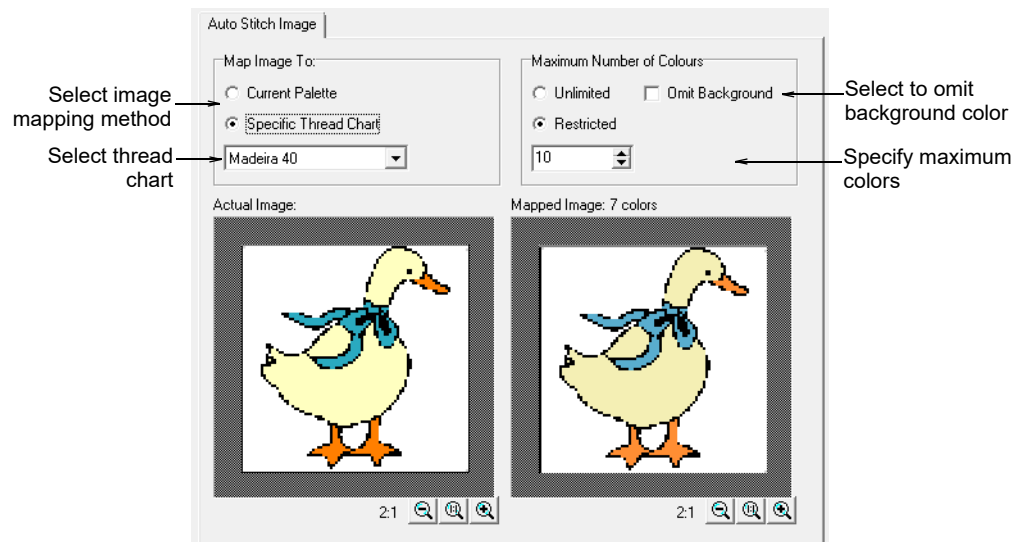

### To digitize with Auto Stitch...

- 1 Prepare your image as necessary. Use a third party paint program to clean up the image.

2 In **Picture** mode, load a picture.

3 In **Design** mode, click the **Auto Stitch** icon and click the image. The **Auto Stitch** dialog opens.

4 Select to map the picture colors to:

- ▶ **Current Palette:** Only colors in the current palette are used.

- ▶ **Specific Thread Chart:** Only colors in a selected thread chart are used.

Current Palette:  
Restricted Colors

Specific Thread Chart:  
Thread Colors - CSD

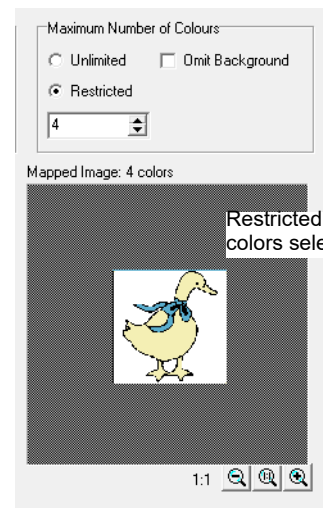

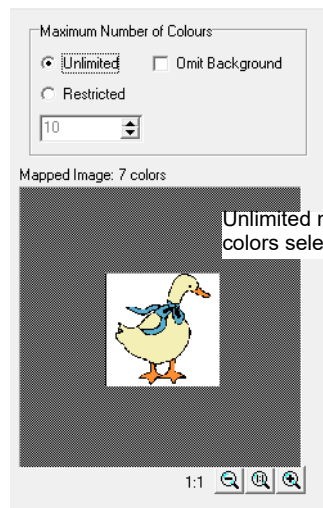

Specific Thread Chart:  
Isacord 40

**5** Specify the maximum number of colors to be used:

Unlimited	Thread colors will be allocated according to the number of colors in the palette selected in the first dialog.
Restricted	Enter the number of colors you want to use.
Omit background	Select to omit the background color.

The results display in the preview pane.

- 6 Click **OK**. The picture is digitized. You may need to touch up some areas manually.

4 colors selected

Unlimited maximum  
colors selected

**Note** **Auto Stitch** is disabled if no picture is loaded.

## Digitizing cross stitch letters

---

**A** Use Design > Lettering to add letters to your design. Right-click Lettering to open the Font dialog.

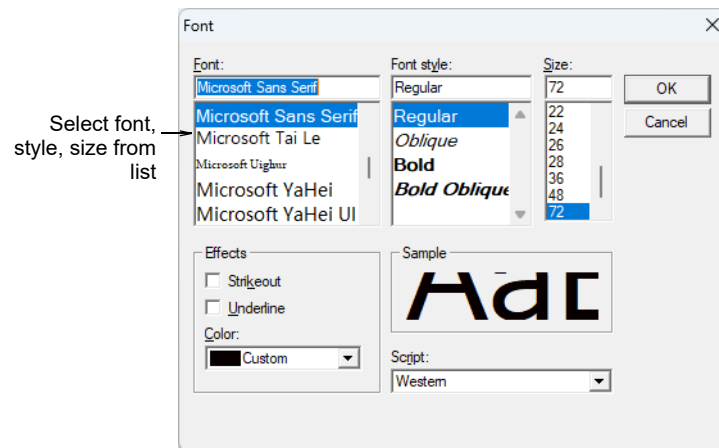

As with BERNINA Embroidery Software, BERNINA Cross Stitch lets you add lettering to a design by typing it directly in the design window. In BERNINA Cross Stitch use the **Font** dialog to select font, size and style. Select either outline or fill to digitize letters. Once typed, you cannot edit letters. Each letter is treated as a stitch block.

**Tip** Lettering in BERNINA Cross Stitch may appear thicker than the original TrueType font. This is generally due to 'ClearType' font smoothing which is turned on by default in Windows Vista or later. Temporarily turning off ClearType produces better lettering in BERNINA Cross Stitch although this may affect its appearance in other applications.

### To digitize cross stitch letters...

- 1 Right-click the **Lettering** icon. The **Font** dialog opens.

- 2 Select a font, style and size from the lists.
- 3 Click **OK**.
- 4 Click the start point in the design window.
- 5 Type the letters and press **Enter**.

Letters with fill stitches

Letters with outline stitches

**Tip** Use **Creative Cross** to add lettering objects to your cross stitch design. See Reference Manual for details.

**Tip** To edit letters, use **Auto Select** with the **Ctrl** key to select. Then change the stitch type or color as required.

# CHAPTER 4

## CROSS STITCH EDITING

---

BERNINA Cross Stitch provides techniques for editing cross stitch designs, including moving, rotating, and mirroring stitch blocks. You can erase stitches as well as change colors and stitch types of selected areas. You can clone a selection for re-use as a 'rubber stamp' and fill large areas with motifs or special composite stitches. You can also edit stitches to create combinations of partial crosses comprised of multiple colors.

This section provides details of cross stitch editing features including selecting and locking stitches as well as simple stitch editing. It also covers transforming stitch blocks. It also deals with special editing techniques as well as adjusting thread colors.

### Selecting & locking stitches

---

In order to edit an area of a design, you must first select it. BERNINA Cross Stitch provides a number of ways to select cross stitches. It also lets you lock cross stitches and/or outlines so that they are not moved or edited by accident.

#### Select cross stitches manually

Use Design > Select Object to select a single stitch or block of stitches.

Use Design > Polygon Select to select irregular areas or shapes.

The **Select Object** and **Polygon Select** tools work in a similar way to BERNINA Embroidery Software. The difference is that in BERNINA Cross Stitch you work with stitch blocks or areas rather than design objects.

**Caution** You cannot select cross stitches outside the hoop.

### To select cross stitches manually...

- ▶ With the **Select Object** tool selected, simply drag a bounding box around the area to be selected.
- ▶ With the **Polygon Select** tool selected, mark reference points around the area you want to select and press **Enter**.

Select tool used

Fill stitches deleted

Polygon Select tool used

Fill stitches deleted

**Tip** Hold down **Ctrl** to select multiple areas.

## Select cross stitches automatically

Use Design > Auto Select to select a single color block or an undigitized area.

Auto Select is specific to BERNINA Cross Stitch. It allows you to select a single color block or a closed undigitized area. Only adjoining stitches of the same color are selected.

---

### To select cross stitches automatically...

- 1 Click the **Auto Select** icon.
- 2 Click a block of stitches. Only adjoining stitches of that color are selected.

**Tip** Hold down **Ctrl** to select multiple blocks.

Color block selected

Hold down Ctrl to select yellow color blocks

**Tip** You can change the color of the selection completely by selecting a color from the palette.

## Lock stitches

You can lock cross stitches and/or outlines so that they are not moved by accident.

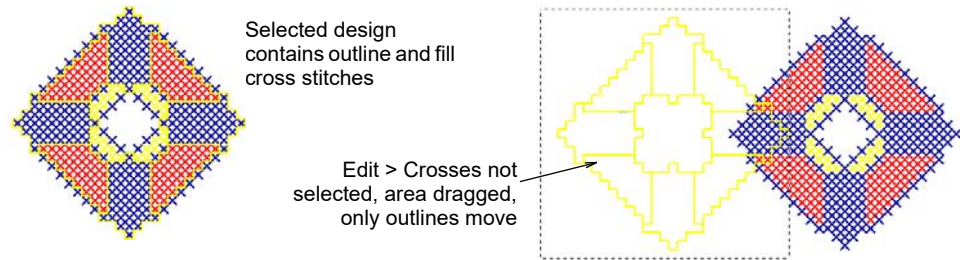

---

### To lock stitches...

- 1 Select **Edit > Crosses** or **Edit > Outlines**.

When **Crosses** is ticked in the menu, cross stitches can be moved. Likewise, when **Outlines** is ticked, outlines can be moved.

- 2 Select an area and click and drag to move stitches.

- 3 Select **Crosses** or **Outlines** again to uncheck it and lock all crosses or outlines.

## Simple stitch editing

---

BERNINA Cross Stitch lets you change the color or stitch type of selected stitch blocks at any time. You can also remove stitches at any time.

**Tip** BERNINA Cross Stitch lets you change the thread colors of an existing design. You can also mix your own colors to more closely match the required design colors. See [Select stitch colors](#) for details.

## Copy, cut, paste stitch blocks

Use General > Copy to copy selected stitch blocks to the clipboard.

Use General > Cut to cut selected stitch blocks to the clipboard.

Use General > Paste to paste copied stitch blocks from the clipboard.

You change copy, cut and paste selected stitch blocks at any time. The difference is that in BERNINA Cross Stitch you work with stitch blocks or areas rather than design objects.

---

### To copy, cut and paste stitch blocks...

- 1 Select the stitch block to copy or cut.
- 2 Click the **Copy** or **Cut** icon. The selected area or areas are copied to the clipboard.
- 3 Click the **Paste** icon. The duplicate area is pasted over top of the selected area.
- 4 Click and drag to move the pasted stitch block.

**Tip** Duplicate and rotate blocks of stitches to make patterns.

---

### Related topics

- ▶ [Rubber stamp fills](#)

### Change stitch block settings

 Use Design > Auto Select to change the color or stitch type of selected stitch blocks.

You can change the color and/or stitch type of selected stitch blocks at any time.

## To change stitch block settings...

- 1 Use **Auto Select** to select the color block/s.

**Tip** Hold down **Ctrl** to select multiple blocks.

- 2 Select a new color from the palette. The selected color fills the selection area. The area remains selected.

- 3 Select a new stitch type from the **Stitch** toolbar. The selected stitch type fills the selection area.

## Related topics

- ▶ [Select cross stitches automatically](#)

## Erase fills & single lines

Use Design > Eraser to erase fills and single lines.

Use the **Eraser** tool to remove stitches. The eraser will remove either fill stitches or single line borders depending on the stitch type selected. Cross-stitched borders are treated as fill stitches.

**Caution** You cannot select and erase stitches outside the hoop.

-----  
**To erase a fill or single line...**

- 1 Click the **Eraser** icon.
- 2 Select **Fill** on the **Stitch/Color** bar.
- 3 Click and drag the cursor across the stitches to be removed. Only fill stitches are removed. Any single line borders remain.

Drag cursor over stitches to erase

Only fill stitches erased, single line borders remain

**Tip** You can also erase cross stitches by selecting them and pressing the **Delete** key.

- 4 Select **Outline** on the **Stitch/Color** bar.
- 5 Click anywhere on a single line. The line is removed. Any cross stitches are not erased.

Click line to erase

Line erased

**Note** A single line border is removed in one click.

## Transforming stitch blocks

---

BERNINA Cross Stitch lets you perform various transformations on selected blocks of cross stitches. You can move them, rotate them in a clockwise or counter-clockwise direction. You can also mirror blocks of cross stitches either horizontally or vertically.

### Move cross stitch blocks

You can move blocks of cross stitches at any time.

---

#### To move a block of cross stitches...

- 1 Select the stitch block to move.
- 2 Click and drag them to a new location.

---

#### Related topics

- ▶ [Selecting & locking stitches](#)

### Rotate cross stitch blocks

Use Design > Rotate 90°CW/CCW to rotate selected stitches. Click to rotate clockwise. Right-click to rotate counter-clockwise.

You can rotate blocks of cross stitches in a clockwise or counter-clockwise direction. Duplicate and rotate blocks of stitches to make patterns.

---

### To rotate a block of cross stitches...

- 1 Select the stitch block to rotate.
- 2 Click the **Rotate 90° CW/CCW** icon.

---

### Related topics

- ▶ [Selecting & locking stitches](#)

## Mirror cross stitch blocks

Click Design > Mirror Horizontal to mirror selected stitches horizontally.

Click Design > Mirror Vertical to mirror selected stitches vertically.

You can mirror blocks of cross stitches either horizontally or vertically.

---

### To mirror a block of cross stitches...

- 1 Select the stitch block to mirror.

2 Click the **Mirror Horizontal** icon.

**Tip** To mirror the complete design, select **Arrange > Mirror Horizontal/Mirror Vertical**.

### Related topics

▶ [Selecting & locking stitches](#)

## Special editing techniques

BERNINA Cross Stitch provides a number of editing techniques which are especially helpful for cross stitch digitizing. You can clone a selection for re-use as a 'rubber stamp' and fill large areas with motifs or special composite stitches. You can combine fractional cross stitches in a variety of ways. You can also add a cross stitch border or a single line border, or both, to areas of a design.

### Rubber stamp fills

Use **Design > Rubber Stamp** to clone stitches.

Clone a selection for re-use as a 'rubber stamp' and fill large areas with motifs or special composite stitches.

#### To rubber stamp fills...

1 Click the **Select Object** icon and select the area to be cloned.

- 2 Click the **Rubber Stamp** icon. The selected area is copied and attached to the pointer.
- 3 Click to place the stamp as many times as you want.

- 4 Press **Esc** or select another icon to turn off **Rubber Stamp**.

## Create combination stitches

Use Design > Pencil to add combination stitches.

Fractional cross stitches –  $\frac{1}{4}$ ,  $\frac{1}{2}$ , or  $\frac{3}{4}$  – can be combined to make crosses comprised of multiple colors. You can also combine mini crosses, elongated vertical or horizontal crosses and outline stitches.

### To create combination stitches...

- 1 Select a stitch type.

Select 3/4 for three quarter crosses.

Select 1/2 for half crosses.

Select 1/4 for quarter crosses.

Select Mini Cross for mini crosses.

Select Elongated Vertical Cross for vertical crosses.

Select Elongated Horizontal Cross for horizontal crosses.

- 2 Select a color from the color palette.
- 3 Click the **Pencil** icon.
- 4 Click where you want the stitch to be inserted.

**Note** If you do not have **Insert** selected, the whole stitch will be replaced.

- 5 Repeat as many times as needed.

### Related topics

### Add borders to selected areas

Add a cross stitch border or a single line border, or both, to selected areas of a design.

---

### To add borders to a selected area...

- 1 Select the **Outline** icon.
- 2 Click the **Area Fill** icon and click inside an area. A line of outline stitches is added around the edges of the selection.
- 3 Optionally, click again to add another line of stitches inside the first line.

No border

Single line border

Double cross border

**Tip** To combine a cross stitch with a line border, select **Full Cross** stitch type and **Area Fill**, then select **Single Line** and **Area Fill** again.

---

## Changing stitch colors

BERNINA Cross Stitch allows you to set up an unlimited number of color slots. New objects are digitized using the currently selected color. You can change color before or after digitizing. BERNINA Embroidery Software also lets you manage the thread colors in your palette. Select from a range of commercial thread charts. Adjust the exact number of colors in the palette as required. Add extra slots as required.

### Search & assign threads

You can search for a thread by code or description and assign it to a selected design color slot. The supplied charts represent the brands of threads that BERNINA Cross Stitch supports. Each chart has a range of colors associated with it. The code, brand and description of each color is displayed so that you can easily find them in a craft or sewing shop. You can select colors by shade or by number. Select the thread chart for the

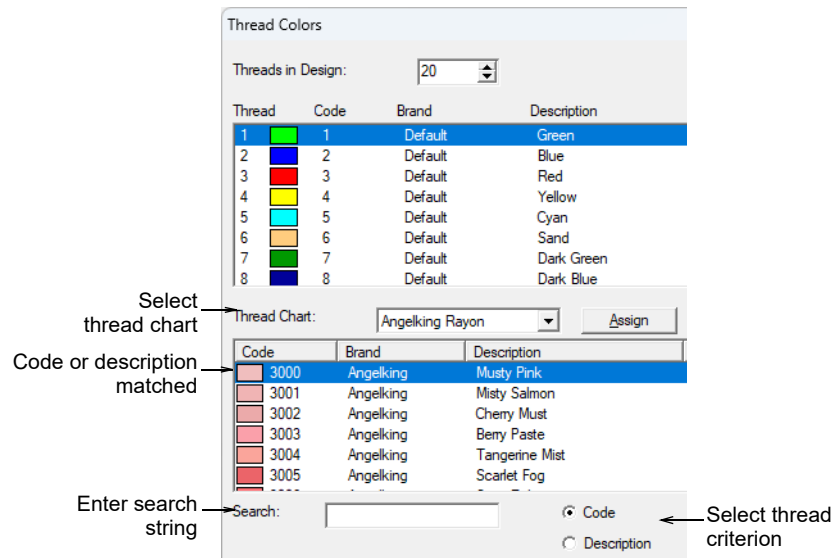

brand of thread you have at home or just select a chart which has colors you like.

**Caution** The representations of commercial thread charts are approximate, and the computer simulations are not intended to exactly match the identified thread color.

### To search and assign a thread...

1 Select **Settings > Thread Colors**. The **Thread Colors** dialog opens.

2 Select a thread chart from the **Thread Chart** list.

3 Select the thread criterion to search on – **Code** or **Description**.

Code is the identification number of a thread color in a brand.

4 In the **Search** field, enter the first few characters of the required code or description.

The system searches for the closest match and displays them in the thread color list.

5 Select a color slot in the **Threads in Design** panel and click **Assign**.

- Click **OK** to close.

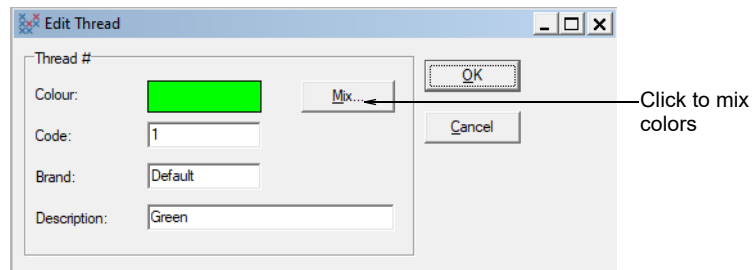

**Note** Selected color settings only apply to the current design and are part of the 'design properties'. As such they are saved with the design.

## Mix thread colors

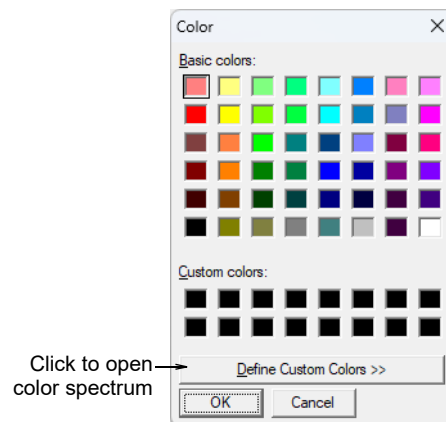

You can change the color that displays for a particular thread, or create new thread colors using the **Color** dialog.

### To mix your own thread colors...

- Click **Edit** in the **Thread Colors** dialog. The **Edit Thread** dialog opens.

- Click **Mix**. The **Color** dialog opens.

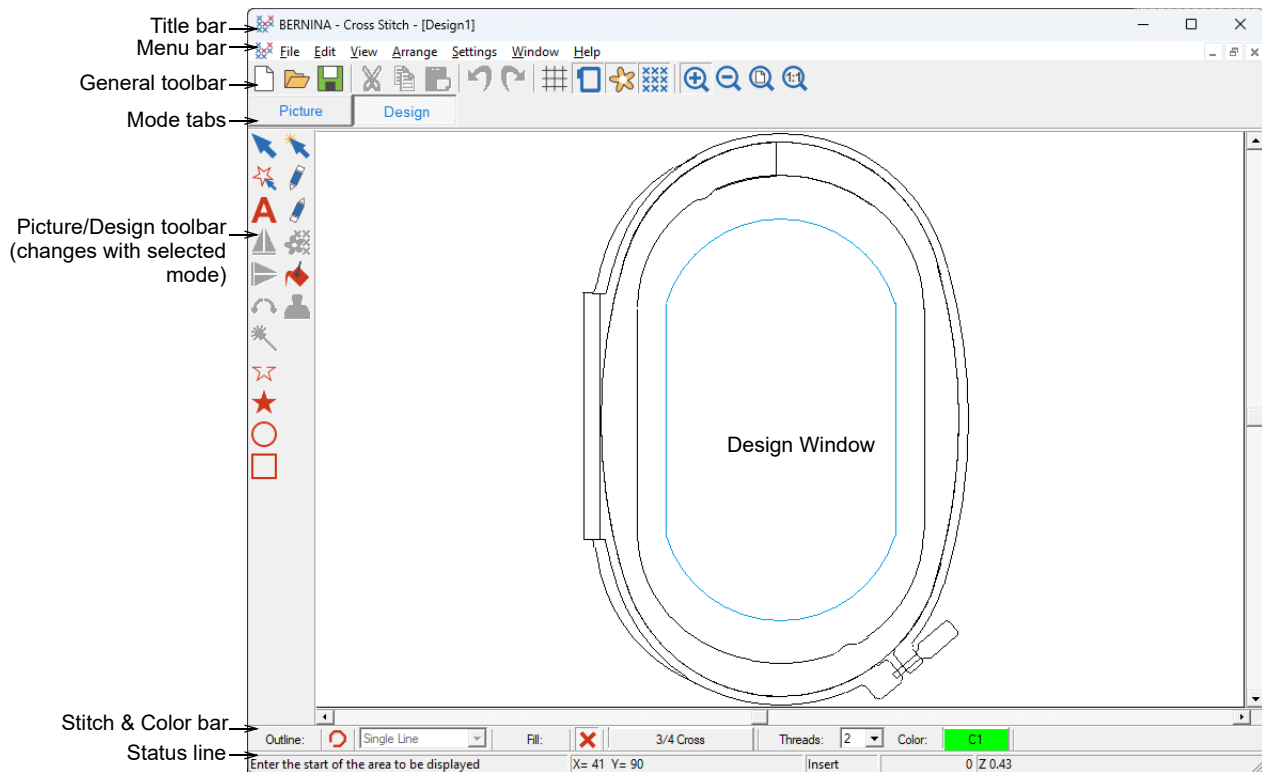

- 3 Click **Define Custom Colors** to open the color spectrum.
- 4 From the **Basic colors** table, select a color that closely matches the color you require.
- 5 Click and drag the cross hairs on the color spectrum to get the exact color you require.
- 6 Drag the slider on the right of the color spectrum to adjust color brightness.  
The HLS and RGB values appear in the bottom right-hand corner of the **Color** dialog. Enter these values directly to define exact colors.
- 7 When you have mixed the required color, click **Add to Custom Colors**.
- 8 Click **OK**. The new color appears in the **Color** preview box.

# APPENDIX A

## CROSS STITCH QUICK REFERENCE

This Quick Reference details all menu options and toolbars available in BERNINA Cross Stitch.

### BERNINA Cross Stitch design window

## BERNINA Cross Stitch menu bar

---

The BERNINA Cross Stitch window menu bar contains the pulldown menus described below. Some are also available as toolbar buttons.

**Note:** Standard Windows **Alt** key shortcuts apply. Use the **Alt** key with the letter underlined in the menu. To cancel an operation, press **Esc** twice.

### File menu

New	Open new empty design.
Open	Open design.
Close	Close current design window.
Save	Save current design.
Save as	Save current design to with a different name, location or format.
Design properties	Add comments about design for printing on worksheet.
Exit	Close all open designs and exit BERNINA® Embroidery Software BERNINA Cross Stitch program.

### Edit menu

Undo	Cancel last command.
Redo	Re-apply cancelled commands.
Cut	Delete selection and places it on clipboard.
Copy	Copy selection to clipboard.
Paste	Paste contents of clipboard to design window.

Duplicate	Duplicate selection and place it on current selection.
Delete	Delete selection without placing it on clipboard.
Select All	Select all objects in design.
Deselect All	Deselect all selected objects in design.
Insert	Insert a fractional cross stitch in the same square as other fractional stitches as long as they are not on top of each other.
Outlines	Lock or unlock outline stitches for editing.
Crosses	Lock or unlock cross stitches for editing.

### View menu

By color	Show only selected colors in design.
Show 1:1	Show design at correct size.
Show all	Show whole design.
Zoom box	Zoom selected area to full window size.
Redraw	Redraw design.
Grid	Show or hide grid and sets grid size and spacing.
Crosses	Show stitches as colored tiles or cross stitches.
Picture	Show or hide background picture.
Hoop	Show or hide hoop and sets hoop size and position.
Measure	Measure design size.

**Arrange menu**

Center design	Move design to the center of the hoop.
Mirror horizontal	Mirror selected object/s horizontally about center.
Mirror vertical	Mirror selected object/s vertically about center.

**Settings menu**

Thread colors	Assign thread colors for use in design.
Fabric count	Set number of stitches per inch or mm.
Fabric display	Select background fabrics and colors.
Options	Adjust settings for display window.
Display setup	Calibrate screen.
Scanner setup	Set scanner options.

**Window menu**

Cascade	Display any open windows in a 'cascaded' or stair-stepped fashion.
Tile horizontally	Display any open windows in a horizontally 'tiled' (non-overlapping) fashion.
Tile vertically	Display any open windows in a vertically 'tiled' (non-overlapping) fashion.
1 (title of open window)	Choose from a list of open windows titles in the order in which they are stacked.

**Help menu**

Help topics	List online help topics.
Reference manual	Open User Guide in Adobe Acrobat PDF format.

**BERNINA Cross Stitch window toolbars**

The BERNINA Cross Stitch window contains the toolbars described below.

## Mode tabs

There are two **Mode** tabs in the BERNINA Cross Stitch window. Different modes display different toolbars.

**Picture** Load, edit and save picture as a background for embroidery design. Embroidery shapes are not shown.

**Design** Create and modify embroidery designs. Show embroidery shapes as well as pictures.

## General toolbar

	New	Same as File > New
	Open	Same as File > Open
	Save	Same as File > Save
	Cut	Same as Edit > Cut
	Copy	Same as Edit > Copy
	Paste	Same as Edit > Paste
	Undo	Same as Edit > Undo
	Redo	Same as Edit > Redo
	Grid	Same as View > Grid
	Hoop	Same as View > Hoop
	Picture	Same as View > Picture

	Crosses	Same as View > Crosses
	Zoom box	Same as View > Zoom Box
	Zoom out 2X	Same as View > Zoom Out 2X
	Show all	Same as View > Show All
	Show 1:1	Same as View > Show 1:1

## Picture toolbar

	Select picture	Select pictures in design window.
	Load picture	Insert picture in design window.
	Scan picture	Scans picture into BERNINA® Embroidery Software.
	Dim picture	Dim or brighten picture to show stitches more clearly in design mode.
	Save picture	Save picture after editing.

## Design toolbar

	Select object	Select a single stitch or block of stitches.
	Polygon select	Select irregular areas or shapes.
	Lettering	Create lettering and change lettering properties.
	Mirror horizontal	Same as Arrange > Mirror Horizontal

	Mirror vertical	Same as Arrange > Mirror Vertical
	Rotate 90° CCW / CW	Rotate selected objects in 90° increments. Click to rotate counter clockwise. Right-click to rotate clockwise.
	Magic Wand	Digitize single shape in design.
	Open curve	Draw and digitize open shapes.
	Closed curve	Draw and digitize closed shapes.
	Circle / Oval	Draw and digitize ovals or circles.
	Rectangle	Draw and digitize rectangles or squares.
	Auto select	Select a single color block or an undigitized area.
	Pencil	Draw single stitch or line of stitches.
	Eraser	Erase cross stitches.
	Auto stitch	Digitize picture automatically. (This process is different to BERNINA® Embroidery Software as it converts pixels to cross stitches.)
	Area fill	Fill closed shape with stitches.
	Rubber stamp	Clone selection for re-use as 'rubber stamp'.
